

Thank you for the opportunity to speak Mr. Chairman and committee members.

We have collecting 500 petitions against this compact and submitted them to the Judiciary committee when they voted on the compact in the 2013 Legislation. They are now available at the archives in the State Historical Society.

We now have collected about 200 signatures on petitions against this compact and will continue to do so.

Can I give them to you?

I also want to comment on the letter written to Governor Bullock and Attorney General Tim Fox with ~~x~~ type written names of Irrigator's who are for the compact. Anyone can type names to paper, I have signatures of people who have read the compact and signed the petition.

We know some of these Irrigator's on this list of typed names are against this compact.

Thank you

PETITION TO VOTE AGAINST THE CSKT RESERVED WATER RIGHTS COMPACT

WHEREAS, the negotiating parties for the CSKT Reserved Water Rights Compact concede western Montana water rights to Federal and Tribal governments with complete disregard of historical acts by the Federal Government to "open" the reservation to homesteading,

WHEREAS, the private agreement known as the Flathead Indian Irrigation Project (FIIP) Water Use Agreement is an unconstitutional relinquishment of Montana's responsibility to protect irrigators and allocates only 11% of project water to irrigation, and a staggering 89% to instream flows,

WHEREAS, the compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, the Unitary Management Ordinance also known as the "Grand Bargain", is designed to unconstitutionally remove all citizens within the exterior boundaries of the Flathead Reservation from under state jurisdiction concerning our water rights,

WHEREAS, the off reservation water claims in this compact are out of the scope of the compact commission and are not Federal Reserved Water Rights,

THEREFORE, I (we) demand our legislature:

1. To vote against the approval of the CSKT Water Compact brought before the legislature in this current session
2. To allow the compact commission to sunset and move the tribal federal reserved water right decisions into the Montana General Stream Adjudication Process.
3. To take the necessary steps to reaffirm the rights of Montanans to control the natural resource of water within the boundaries of the State of Montana as is guaranteed by our state Constitution.

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and possibly alter the process through which commission appointments are made

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact principles drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made

PETITION TO VOTE AGAINST THE CSKT RESERVED WATER RIGHTS COMPACT

WHEREAS, the negotiating parties for the CSKT Reserved Water Rights Compact concede western Montana water rights to Federal and Tribal governments with complete disregard of historical acts by the Federal Government to "open" the reservation to homesteading,

WHEREAS, the private agreement known as the Flathead Indian Irrigation Project (FIIP) Water Use Agreement is an unconstitutional relinquishment of Montana's responsibility to protect irrigators and allocates only 11% of project water to irrigation, and a staggering 89% to instream flows,

WHEREAS, the compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, the Unitary Management Ordinance also known as the "Grand Bargain", is designed to unconstitutionally remove all citizens within the exterior boundaries of the Flathead Reservation from under state jurisdiction concerning our water rights,

WHEREAS, the off reservation water claims in this compact are out of the scope of the compact commission and are not Federal Reserved Water Rights,

THEREFORE, I (we) demand our legislature:

1. To vote against the approval of the CSKT Water Compact brought before the legislature in this current session
2. To allow the compact commission to sunset and move the tribal federal reserved water right decisions into the Montana General Stream Adjudication Process.
3. To take the necessary steps to reaffirm the rights of Montanans to control the natural resource of water within the boundaries of the State of Montana as is guaranteed by our state Constitution.

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact principles drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made

Signed this 13th day of Aug 13, 2013

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made

Signed this 13 day of August, 2013 .

PETITION TO VOTE AGAINST THE CSKT RESERVED WATER RIGHTS COMPACT

WHEREAS, the negotiating parties for the CSKT Reserved Water Rights Compact concede western Montana water rights to Federal and Tribal governments with complete disregard of historical acts by the Federal Government to "open" the reservation to homesteading,

WHEREAS, the private agreement known as the Flathead Indian Irrigation Project (FIIP) Water Use Agreement is an unconstitutional relinquishment of Montana's responsibility to protect irrigators and allocates only 11% of project water to irrigation, and a staggering 89% to instream flows,

WHEREAS, the compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, the Unitary Management Ordinance also known as the "Grand Bargain", is designed to unconstitutionally remove all citizens within the exterior boundaries of the Flathead Reservation from under state jurisdiction concerning our water rights,

WHEREAS, the off reservation water claims in this compact are out of the scope of the compact commission and are not Federal Reserved Water Rights,

THEREFORE, I (we) demand our legislature:

1. To vote against the approval of the CSKT Water Compact brought before the legislature in this current session
2. To allow the compact commission to sunset and move the tribal federal reserved water right decisions into the Montana General Stream Adjudication Process.
3. To take the necessary steps to reaffirm the rights of Montanans to control the natural resource of water within the boundaries of the State of Montana as is guaranteed by our state Constitution.

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact principles drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact principles drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact principles drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact principles drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact principles drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact principles drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made

PETITION RELATED TO THE FLATHEAD RESERVATION FEDERAL RESERVED WATER RIGHTS COMPACT

WHEREAS, problems with the existing compact including its foundational premises do not provide for a fair and equitable settlement of water rights, and are insurmountable hurdles which cannot be resolved within the existing compact,

WHEREAS, the negotiating parties failed to quantify the amount of water necessary to fulfill the purpose for the reservation within the existing compact documents,

WHEREAS, components of the proposed Compact involve the unconstitutional taking of property rights (water); require the State to relinquish its constitutional duty and statutory authority to manage state water rights and resources, and place state citizens under the jurisdiction of a government within which they have no vote or representation,

WHEREAS, the Compact improperly includes off-reservation water rights to support an off-reservation Treaty right to 'take fish' when the right to harvest fish does not include a water right,

WHEREAS, the existing compact documents have far reaching environmental and economic implications that have been largely ignored by the compact commission,

WHEREAS, we believe that there are reasonable alternatives to the existing proposed CSKT Compact and that a false choice is being presented to Montanans to 'accept this compact or litigation',

THEREFORE, I petition the Montana legislature, the Attorney General and the Governor of the state of Montana to:

1. Support the Alternative Comparative Compact principles drafted by legislators and Concerned Citizens of Western Montana as the starting point for a new, fair and equitable compact.
2. Investigate the compact commission with respect to their complete and utter failure to protect the citizens of Montana in the proposed CSKT Water Compact.
3. Pass legislation that will:
 - Provide legal and policy sideboards for the compact commission in anticipation of any new federal reserved water right compacts
 - Prevents the commission from establishing legal precedent and / or taking any action that attempts to circumvent the legislature and courts.
 - Mandate environmental and economic impact studies for all water compacts including this one, before they are submitted to the legislature for ratification.
 - Re-evaluate and alter the process through which commission appointments are made
